of Zimbabwe*

- India -

Water Bandits
with Rajendra Singh

&

*Organic WINS Over
Chemical Agriculture*

Paani Foundation India #3

&

Ever Slow Green
the Story of Auroville

Apologies: A previous poster said we would show the movie Rivers Above the Canopy about the Amazon rainforest on April 7th. We have postponed showing this film until this winter.

This will be the last showing of this film series this Spring. We will resume this Fall.

Many climate films focus on the problems. We are showing films that focus on the best available solutions. We are bringing perspectives not found on mainstream media. This will be an exciting series of mostly new films. This film series is sponsored by the Global Earth Repair Foundation. The Film Festival will be a prelude to the *2nd Global Earth Repair Conference, May 2025* at Fort Worden. Conference #1 was held in May 2019 at Fort Worden.

These film screening events are *by donation* (at the door). Contact Michael Pilarski at friendsofthetrees@yahoo.com or go to www.globalearthrepairfoundation.org for more details.
